UNRUH TURNER BURKE & FREES

ATTORNEYS AT LAW

Telecommunications, Wireless & Cable

Our telecommunications lawyers have a full range of resources available to municipal and private clients in this complex and constantly evolving practice area. We craft wireless and right of way ordinances for municipalities, and have litigated tower and infrastructure cases in both state and federal courts. At the same time we track and update our clients as the telecommunications landscape rapidly changes through statute and case law, and market approaches.

In the cable franchise field, our firm has negotiated scores of agreements for municipalities across Pennsylvania, and has been in the forefront of creating fresh approaches to enforcement, public access and franchise fees.

Municipal, private and corporate clients are invited to put our telecommunications, wireless and cable team to work for you in developing strategy and clear paths through these challenging areas of law.
