

Hotel, Hospitality & Franchising

Our hospitality lawyers offer comprehensive legal advice for hotel owners, developers and managers. These services supplement other practice areas of our firm, including commercial real estate, transactional, business entity and employment law.

Our attorneys have extensive experience with the unique aspects of hotel ownership and operation, including the acquisition, maintenance and transfer of essential licenses with nationally recognized hotel franchisors and state liquor control authorities. Our attorneys understand that an agreement of sale for a hotel needs to specifically address the transfer of these important licenses, as well as the transfer of reservations, maintenance contracts and employees, so that the legal and financial risks are minimized for our client.
