

Taxation

Our tax firm offers a broad range of individual, business and estate tax planning services through our professional tax attorneys. These services supplement our services in other areas such as estate planning and representation of clients in real estate and commercial transactions and the formation of business entities.

We provide comprehensive advice and counseling on the structuring and tax implications of real estate and business acquisitions, business reorganizations, joint ventures and partnerships.

We advise and represent clients in structuring and completing tax deferred exchanges of like-kind property and provide qualified intermediary services in carrying out like-kind exchanges of real estate.

As part of the Firm's estate planning and administration practice, we provide comprehensive advice on gift and estate tax planning, including planning for family wealth transfers, business succession, family limited partnerships, charitable giving and post mortem tax planning techniques.
